

21-Day LinkedIn Plan — v2 (full daily)

Separated model · all three accounts post every day · founders teach, the page carries the product.

The two personal accounts never mention the product — they share what Eric and Pritam are learning and how they apply it. Only the mrk18 page carries the domain and what we're building. Founders quote-share the page (about weekly) so audiences connect the dots.

Per your choice this version fills all 63 slots (3 accounts × 21 days). No posts produced yet — approve first.

ONE CAUTION

Daily-per-account is the high-volume route. It maximises presence but each post's reach can dip past ~4/week on a single profile. Batch ahead, and if engagement softens, convert a few cells to 'engage-only' days — the calendar still works.

The model — three separate lanes

ERIC — personal	TEACHES: applied AI / building agents	What he's learning building AI and how he applies it. Case studies, mental models, 'I was wrong about X'. NEVER names the product.
PRITAM — personal	TEACHES: founder marketing / GTM	What he's learning about how founders market and what works. Contrarian takes, frameworks, customer stories. NEVER names the product.
mrk18 — company page	CARRIES: the domain + the product	The only place the AI-CMO domain and 'what we're building' appear. Problem-space -> category POV -> reveal + waitlist.

THE BRIDGE (how association forms without a pitch)

Founders quote-share a page post ~once a week with 100+ words of their own angle (never a bare repost — those barely reach in 2026). Reader gets the founder's insight, sees mrk18 attached, infers the link. Anything pointing at the company stays under ~20% of each founder's feed.

Storytelling & knowledge engine

STORY STRUCTURES we rotate

Hook -> Tension -> Turn -> Takeaway — open a loop, raise stakes, reveal the pivot, land one lesson.

I was wrong about X -> the system — highest-trust; earns saves + comments.

Mini case study (problem -> experiment -> data -> verdict) — Eric's default; real numbers = credible.

Before / After / Bridge — Pritam's default for 'here's what changed'.

Story-wrapped framework — teachable framework inside one specific moment.

HOOKS & SAVES

Curiosity > contrarian > story > data > question. Hook under ~10 words, above the fold. Saves ~5x a like, comments ~15x — build reference-worthy posts, end on one real question.

THE 'LEARNING -> EXECUTION' RULE

Show you apply the knowledge — but on a generic/hypothetical case, never your actual product.

Teach the principle; the reader can't reverse-engineer the roadmap.

WEEK 1 · FOUNDATIONS — establish each founder's topic; the page opens the problem space

	ERIC · personal (teaches AI)	PRITAM · personal (teaches GTM)	mrk18 PAGE · domain + product
Day 1 Mon	STORY+LESSON 'I was wrong about what makes AI hard' — the harness, not the model.	STORY+DATA 'I looked at 11 founders' marketing. Green dashboards, empty banks.'	DOMAIN Most founder marketing is activity, not results — the gap is invisible.
Day 2 Tue	KNOWLEDGE What an 'agent' really is (and isn't) — a 60-second mental model.	CONTRARIAN Founders aren't short on tactics — short on a second opinion.	CAROUSEL * Activity vs results: the gap most founders miss.
Day 3 Wed	CAROUSEL * How AI agents actually work: Model + Harness.	STORY The cheapest channel founders ignore: their own DMs.	DOMAIN POV The dashboard lies: green metrics can hide a dying funnel.
Day 4 Thu	CASE STUDY 'Gave an LLM a tool, it still failed — the fix was the prompt contract.'	CAROUSEL * The Founder Marketing Stack — the order I map before tactics.	DOMAIN Marketing without a marketing team: the Indian-founder reality.
Day 5 Fri	CASE STUDY '3 ways I tried to stop an agent hallucinating — what worked.'	QUOTE-SHARE » page: activity-vs-results — 'this gap is the whole game'	DOMAIN POV You can't fix what you can't see.
Day 6 Sat	MENTAL MODEL Temperature & top-p: why 'more creative' broke my output.	STORY 'A founder spent big on ads and learned the wrong lesson.'	DOMAIN POV Busy is not the same as growing — a founder pattern.
Day 7 Sun	QUOTE-SHARE » page: the gap — a technical angle on measuring it	REFLECTION '3 things founders taught me this week.'	MILESTONE Week 1: the problem, in one line.

* = uses a daylight infographic · » **quote-share** = founder reshapes the page in their own words (the bridge)

WEEK 2 · DEPTH & POV — go deeper in each lane; the page stakes out the category

	ERIC · personal (teaches AI)	PRITAM · personal (teaches GTM)	mrk18 PAGE · domain + product
Day 8 Mon	MENTAL MODEL 'We're all QA now' — the real skill is evaluating AI output.	CONTRARIAN 'Brand awareness' is often just spend you can't measure.	DOMAIN The 5 things every founder's marketing should answer.
Day 9 Tue	CONTRARIAN RAG isn't a memory upgrade — here's what it actually fixes.	STORY 'I asked 10 founders their CAC. 8 didn't know.'	CAROUSEL * Old way vs new way of founder marketing.
Day 10 Wed	CAROUSEL * Chatbot vs agent — what 'agentic' actually means.	BEFORE/AFTER From 'just posting' to a repeatable channel.	DOMAIN POV Why 'more content' rarely fixes a growth problem.
Day 11 Thu	CASE STUDY 'Cut agent latency 800ms -> 200ms — the one change that mattered.'	CAROUSEL * Vanity metrics vs metrics that matter.	DOMAIN What a weekly marketing 'truth check' would look like.
Day 12 Fri	QUOTE-SHARE » page: old vs new — 'why the old way breaks (systems view)'	CONTRARIAN Most founders have a measurement problem, not a marketing one.	DOMAIN POV Reports don't change behaviour. A conversation does.
Day 13 Sat	KNOWLEDGE Eval-driven development: testing when there's no 'right answer'.	STORY The positioning line that doubled a founder's reply rate.	DOMAIN POV What good marketing visibility actually looks like.
Day 14 Sun	REFLECTION 'What this week's build taught me about cutting scope.'	QUOTE-SHARE » page: old vs new — the field view	MILESTONE Week 2: the category we're building in.

* = uses a daylight infographic · » quote-share = founder reshapes the page in their own words (the bridge)

WEEK 3 • EXECUTION & REVEAL — the page shows what we're building; founders bridge to it

	ERIC • personal (teaches AI)	PRITAM • personal (teaches GTM)	mrk18 PAGE • domain + product
Day 15 Mon	EXECUTION 'How I'd design a system that gives a founder honest marketing advice.'	KNOWLEDGE The 5 questions I'd ask before spending another rupee on marketing.	CAROUSEL * What is an AI CMO? (the reveal)
Day 16 Tue	KNOWLEDGE Why I route between models instead of using one big one.	KNOWLEDGE The 6 numbers I'd want any founder watching weekly.	CAROUSEL * How an AI CMO runs marketing, end to end.
Day 17 Wed	CAROUSEL * How AI systems remember context — the memory stack.	QUOTE-SHARE » page: 'what is an AI CMO' — 'this is the gap I keep seeing'	DOMAIN Advice -> Watchdog -> Execute: the order that matters.
Day 18 Thu	CASE STUDY 'A guardrail that caught a bad output before a user saw it.'	CAROUSEL * 6 numbers every founder should know cold.	MILESTONE What we're executing in the AI-CMO space.
Day 19 Fri	REFLECTION 'What building in the AI-marketing domain taught me.'	STORY 'What a founder said when she saw where her money leaked.'	DOMAIN Who this is for / who it's not for.
Day 20 Sat	QUOTE-SHARE » page: the pipeline — the builder's view	FULL CIRCLE 'Back to the founders I met in week 1 — what I'd tell them now.'	CAROUSEL * What an AI CMO watches every week + soft CTA.
Day 21 Sun	QUOTE-SHARE » page: the reveal + waitlist	QUOTE-SHARE » page: the reveal + waitlist	MILESTONE What we're building, who it's for + waitlist opens.

* = uses a daylight infographic • » **quote-share** = founder reshapes the page in their own words (the bridge)

Asset map

ERIC (personal · AI knowledge)	Model + Harness (D3) · Chatbot vs Agent (D10) · Memory Stack (D17)
PRITAM (personal · marketing knowledge)	Founder Marketing Stack (D4) · Vanity vs Metrics (D11) · 6 Numbers (D18)
mrk18 PAGE (domain + product)	Activity vs Results (D2) · Old vs New (D9) · What is an AI CMO (D15) · Pipeline (D16) · What it Watches (D20)

9 infographics already designed are reused (recaptioned as learning on personal accounts). New visuals to build: ~5 page domain carousels (D2 done, plus D8/D11/D13 supports) and the D20–21 soft-CTA/waitlist cards. Everything else is text — fast to post.

Posting & repost playbook

All three post daily (your choice). Stagger IST windows: Eric ~8 AM, Pritam ~12 PM, page ~4–5 PM.

Quote-share, never bare repost: ~1 page reshare per founder per week, 100+ words of their own angle.

Golden hour: be live the first 60 min; the other founder leaves a real comment; 3+ early commenters = big reach lift.

Links (waitlist) in the first comment only; 0–3 hashtags + one campaign tag.

Each founder writes their OWN words on a shared page post — never identical captions.

Batch ahead (2 sessions/week) so daily output never gets improvised.

To start producing, I need from you

1 · **Confirm the model** — Separated lanes + quote-share bridge + all-daily volume.

2 · **Theme** — Daylight confirmed for all three? (assumed yes)

3 · **Handles + waitlist** — Real mrk18 page handle, waitlist URL, Day-1 date.

4 · **Topic edits** — Any day's topic to swap, drop, or move between lanes.

Reply with those + 'go' and I'll produce it in weekly batches — daylight visuals + ready-to-paste captions (hook, body, first-comment, and the quote-share text for bridge days) — saved to the Drive folder you connect.
